

## The Right Team and Technology Can Make Anything Possible

When you need to solve business challenges with technology, it's important to work with the right team. KasTech Consulting, Inc. helps businesses capitalize on the use of technology to improve business operations. Our team includes programmers, implementation specialists, software consultants, and accounting professionals who help design the ideal solution for your company.

We provide a well defined process with integrated software solutions to help manage Finance, Inventory Control, Made for Stock and Engineered to Order Manufacturing Operations, Project and Job Costing, Service Delivery, Time and Billing, Scheduling, Customer Service, Sales force Automation and Marketing Campaigns. If you have a unique program that must remain as part of your structure we can communicate with it directly in order to provide a totally integrated system for your business.

The right combination of software, hardware, and expertise can enable you to:

- Control inventory costs
- Enhance customer experience and loyalty
- Reduce data redundancy
- Improve employee morale
- Increase cash flow
- Improve sales productivity
- Make better management decisions

### **The Technology Team You Need**

Avoid the hassle and expense of expanding your IT staff with KasTech Consulting. Our consultants undergo certification training, and enjoy an excellent reputation for technical proficiency and customer service.

You can count on the following services:

- Software tailored to your business and industry
- Professional Diagnostic Analysis and System Design
- Software Implementation and ongoing technical support
- Custom Application Programming and reporting
- Comprehensive Training for groups or individuals

### **KasTech Consulting Delivers:**

- Trusted, local support
- High client satisfaction ratings
- Proven Industry and Accounting Experience
- Professional Evaluation Process
- Service for your remote offices

*"I was very interested in speaking with KasTech when I found out the hosted version of SageCRM might be the answer to my troubles.*

*I was using Act! by Sage and found that I was quickly outgrowing it's functionality.*

*I was immediately impressed with such a comprehensive program, it didn't take up any space on my computer, had more customization features and I could access it remotely!*

*It was a wonderful change."*

## The Right Team and Technology Can Make Anything Possible

### Our Tools for Success

We start with a review to help you find the gaps in your processes and systems. We then deliver a document detailing how those gaps are truly impacting your business and provide process changes and systems requirements necessary for a successful implementation. We find that using our processes and proven software technology allows for greater overall efficiencies, lower total cost of ownership, and most importantly, a successful project implementation.

KasTech Consulting is proud to distribute award-winning solutions from Sage Software, as well as integrated third-party applications. Sage Software is a leader in the business software industry and features an extensive channel of development partners that provide industry specific solutions. Sage Accpac and SageCRM are powerful, adaptable solutions perfectly suited for manufacturers, wholesale distributors, and professional services firms.

**Sage Accpac ERP** offers unparalleled flexibility that enables us to fully tailor it to enhance the way you do business. You can build what's best for your company including Financials, Operations, Manufacturing, HR, CRM, Warehouse Management, e-Commerce and Fixed Asset Management. Used in more than 150 countries, Sage Accpac ERP wins awards year after year in Accounting Today and The CPA Technology Advisor.

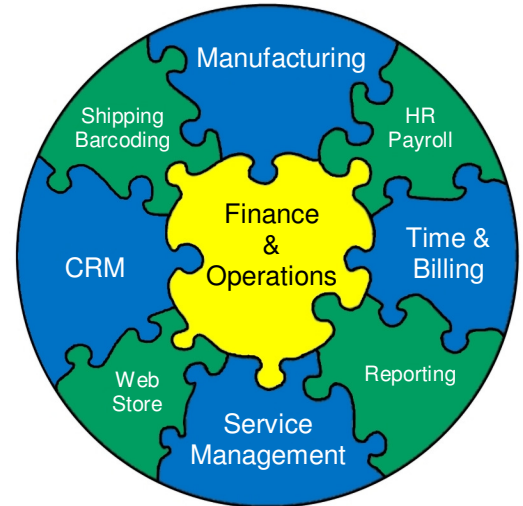

With Sage Accpac ERP, you can choose:

- Your deployment preference: Web-based or Client-Server
- Your operating system: Linux or Windows
- Your database: MS-SQL, Pervasive, IBM-DB2 or Oracle
- Your language: Different languages per user
- Your currency: Multiple currencies per company

**SageCRM** is a feature-rich, fully customizable Customer Relationship Management package that tracks Sales Opportunities, Communications, Marketing Campaigns, Company Calendars, Service Tickets and Customer Information.

Fully integrated with Sage Accpac ERP, it delivers:

- On Demand or In House deployment
- Access to customer data via the Web or mobile device
- Ability to synchronize data to access remotely offline
- Full integration with Outlook, Excel and Word applications
- High adoption rates by employees

*"On a scale of 1 to 10, we would rate KasTech Consulting a 10!"*

*We would absolutely recommend their services... Our consultant is a CPA, so not only does he know the Accpac software inside and out, he also understands the intricacies of accounting."*

**Performance Learning Systems, Allentown, PA**

*"We called KasTech to design a custom steel processing program that could integrate seamlessly with our Accpac accounting system."*

*The program, the integration, and the exceptional response and support have made us extremely happy with KasTech Consulting as a whole."*
