

**Step 1. Graphical Product Configuration**

Staff, Dealers or Surfing consumers can configure their order quickly, direct from their browser, from virtually anywhere!

**Step 2. Assisted Product Selection**

The user is guided through available options and choices for the product with assisted ordering. Only workable product options will be allowed. Products that cannot be made are not possible!

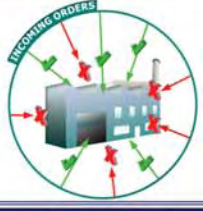

**Step 3. Online Ordering Satisfaction**

Configur8or calculates costing, pricing and any other critical parameters necessary for users to check they have right item before they complete the order over the internet!

**Step 4. Internet Ordering Ensures Valid Product Manufacture & distribution**

Incredibly, the only incoming orders for manufacture and distribution will be valid ones. Items that cannot be sent for manufacturing, will not make it past the guided ordering stage!

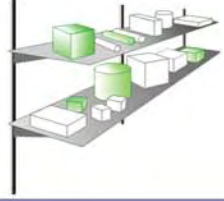

**Step 5. Software Guarantees Connected Orders**

Correct parts, components, operations, dimensions, costs, labour, delivery times, pricing, calculations & more stay connected to orders.

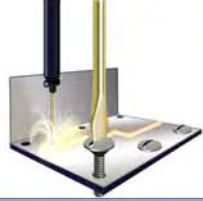

**Step 6. Correct Line Item Picking**

When picking line items, Configur8or ensures that only the correct items will be selected from the warehouse to the assembly lines.

**Step 7. Products Assembled with Correct Settings**

Products will be automatically assembled according to preset instructions and with the correct settings where applicable.

**Step 8. Shortened Delivery Times**

Delivery times from the initial order request will be shortened, due to the graphical configurator's amazing ability to eliminate errors, speed-up processes and free up time.
