

PBT for Windows

Flexible, fully integrated bar code management for ACCPAC Advantage Series.

- Translates bar codes to item numbers in ACCPAC Advantage Series
- Prints bar code labels from ACCPAC Advantage Series.

PBT for Windows allows users to manage bar codes, translate bar codes to items, and print bar code labels. It is fully integrated with ACCPAC Advantage Series™. This integration allows users to directly link bar code data to items in ACCPAC Advantage Series Inventory Control. In addition, PBT for Windows provides easy printing and formatting of bar code item labels. Labels can be printed on demand for specific items, or can be printed based on items and quantities on orders, invoices, PO's, receipts and other documents in ACCPAC Advantage Series Inventory Control, Order Entry and Purchase Orders. Data selected for printing is passed to **BarTender**—bar code labeling and design software from Seagull Scientific—which comes bundled with PBT for Windows. PBT for Windows uses the industry-standard report generator, **Crystal Reports**, to generate bar code maintenance reports.

Key Features

- Fully integrated with ACCPAC Advantage Series
- Allows for scanning & translation of bar codes in ACCPAC® item fields
- Tracks bar codes by item, unit of measure, group, customer and/or vendor
- Includes **BarTender** bar code label design software
- Includes sample label specifications
- Includes pre-defined print selection profiles for easy access to data
- Includes bar code maintenance reports designed with **Crystal Reports**.

System requirements

- ACCPAC Advantage Series System Manager 4.1A or higher, any Edition
- ACCPAC Advantage Series Inventory Control and Order Entry 4.1A or higher, any Edition
- Pervasive, IBM DB2 or MS SQL database

- PBT's simple user-interface allows you to print labels for such items as orders, invoices, purchase orders, etc. with ease. It can quickly and easily produce item labels, shipping labels and tags. Users can design their own labels or modify the sample labels provided.
