

# P/O Host Interface

The MJD P/O Host Interface is part of MJD Software's paperless receiving system for ACCPAC Advantage Series™. It is designed to increase the accuracy and efficiency of receiving items in a warehouse environment. P/O Host Interface exports purchase orders from and imports receipts into ACCPAC Advantage Series Purchase Orders. Once the purchase orders are exported to the MJD Nexus, they are uploaded to MJD's Live Receipts program running on a Symbol hand-held terminal. After all the received items have been scanned, the receipt(s) are downloaded to the MJD Nexus. The P/O Host Interface imports them automatically into the Purchase Orders module, the purchase order(s) is updated and a receipt is generated. The P/O Host Interface can also import receipts that have no purchase order.

P/O Host Interface can be part of a complete receiving solution when combined with:

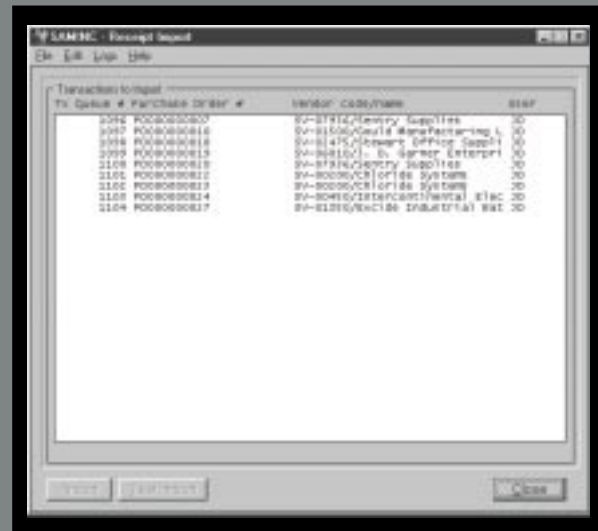

- Live Receipts, running on a Symbol hand-held terminal
- MJD Nexus, to transfer data to/from hand-held terminals and PC
- PBT for Windows, to store bar codes and print labels.

## Key Features

- Paperless receiving system, fully integrated with ACCPAC Advantage Series
- Eliminates errors in the transfer of information during the receiving process
- Exports Purchase Orders to a hand-held terminal to be received against
- Automatically import receipts as they are downloaded from Live Receipts
- Update purchase orders with received quantities and post receipts

## System requirements

- Live Receipts running on Symbol hand-held terminal
- ACCPAC Advantage Series 4.1 or higher, Pervasive SQL, MS SQL or IBM DB2 database
- MJD Nexus
- PBT for Windows

P/O Host Interface imports receipts directly into Purchase Orders, updates the purchase orders with received quantities, and then posts the receipts in the Purchase Orders module.
